What needs physical or design confirmation

The range is organised for visual review; generated imagery does not replace a production specification.

01 / BACK CONSTRUCTION

All backs are inferred from front references. Confirm panel, stripe and texture continuation before sampling.

02 / ST-11 GRAPHIC

Full mesh photograph has no visible Athletic Club graphic. Original workbook graphic is the design source; photo mapping remains provisional.

03 / YARN APPROVAL

Use physical skeins for final colour approval. TC01–TC13 are internal references, not supplier shade codes. Photo lighting and screen rendering affect appearance.

04 / CORRECTED DESCRIPTIONS

ST-19 is a raglan stripe crew tee; ST-15 includes a lower chocolate band. Further full-photo corrections are logged in the Excel catalogue.

05 / CANVA HANDOFF

Import this PPTX into Canva. Labels, text and swatches are editable. Garment visuals remain image assets. The supplied PDF is a stable review copy.
